

MIDNORDIC GREEN TRANSPORT CORRIDOR

Development project North East Cargo Link II

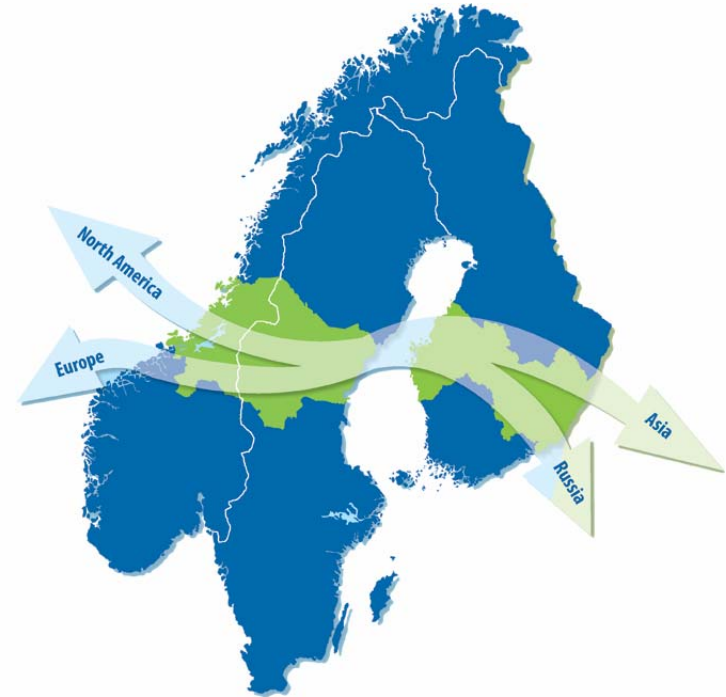

We Need Good Green Connections Now!

- **Budget:** approx. 2,7 M€
- **Duration:** 2010-2013
- **Partnership:** 22 partners from Sweden, Norway and Finland

Lead partner: County Administrative Board of Västernorrland

www.midnordictc.net

Project Objectives:

- **to develop** and promote an East-West Midnordic Transnational Transport Corridor, by improving roads, railways and intermodal solutions in the corridor, and by developing an ICT system for optimization of goods transport in the corridor.
- **to show** the possibilities, potential and benefits of an East-West Midnordic Transnational Transport Corridor to business actors, decision makers and other related actors.
- **to move** goods from roads to railway and sea.

Nevertheless “The **Green** Transport Corridor Thinking” is, from our point of view, **INFRASTRUCUAL NEEDS IN A LOGICAL CONTEXT...!**

How do we do it then...?

- **Close Cooperation** with national transport authorities and industry and other related projects.
- **Remove Bottlenecks** from the corridor.
- **Suggest Improvements** in different part of the infrastructure thru studies.
- **Promote Transnational Cooperation** between Midnordic regions, and connections to UK, continental Europe/BSR and Russia/Asia
- **Promote Well-functioning Communications** and cost-effective transport solutions crucial for business life & local industries
- **Promote the Corridor** to business life in general.
- **Develop a Fully Working Operational ICT-system** for transport operators and cargo owners.
