The Interreg IVB
North Sea Region
Programme

What is StratMoS about

- Project under Interreg IVB North Sea Region Programme, running from April 2008 – September 2011.
- **Aims** to facilitate shift of cargo from road to sea-based intermodal transport and improve accessibility to peripheral areas by supporting the implementation of Motorways of the Sea and related transport networks
- 30 partners from public, industry and research sectors (NO, DK, DE, NL, BE, UK),
+ associated partners from Russia

Key outcomes & results

- Toolbox and systems model for MoS funding applications to assist applicants in preparing their proposal
- Guidelines for MoS applications from peripheral areas
- Northern Maritime Corridor – Extending the MoS network to High North and NW Russia
- Dryports as an integral part of logistics hub structure
- Floating Container and Storage Transhipment Terminal
- Transnational solutions for 'invisible' intermodal transport
- Recommendations for efficient hubs, hinterland connections and on intra-port traffic
- SSS development initiatives
- The use of security devices in container transport to reduce handling time and costs through ports and terminals, in particular Russian ports/terminal
