

Transport system development in Latvia

Inta Rozenšteine
Ministry of Transport, Latvia

The integrated transport system in the Baltic Sea Region- the transit role of Latvia
14.09.2011, Riga

The main goal of the EU new transport policy

- ❖ To develop system which supports development of European economy, increases competitiveness and provides high quality mobility services, at the same time using resources more effectively

The EC's position on the future of transport planning

- ❖ Transport is viewed as a basic necessity in the context of any other priority / sector .
- ❖ Transport sector needs to be seen integrated rather than separately - roads, railways, air transport, sea transport; the emphasis on the synergy / co-modality

Transport policy framework 1

❖ **Competitive, sustainable co-modal transport system, that provides high quality mobility, at the same time effectively using resources**

- 1. Latvia – attractive transit country**
- 2. Ensuring accessibility and mobility opportunities**

Transport policy framework 2

1. Latvia – attractive transit country

1.1. Infrastructure

1.2. Services

2. Ensuring accessibility and mobility opportunities

2.1. Infrastructure

2.2. Public Transport

2.3. Traffic Safety

Research, studies and policy making

- ❖ Do we need additional study
- ❖ Use of existing studies
- ❖ Discussions, seminars etc.

Thank you!
